

Dear Ski Wax Producer,

The International Ski Federation (FIS) and International Biathlon Union (IBU) announced that they will implement a full ban of ski preparation products containing fluor at all its event series from the 2023/2024 season onwards.

With reference to this information, I would like to inform you that we (FIS&IBU together) are planning to organize the 2nd Test session for Ski Wax Producers where you will have the possibility to test your non fluor products according to our test protocol on our devices.

The test session is planned for week 39 in FIS Headquarters Oberhofen SUI.

More detailed information will be sent out after we have an overview of the interest from wax suppliers. It is important that you send personnel that are familiar with the products on a high technical level and can prepare skis.

Could you please let us know by 28th of July 2023 if you are interested in attending the Test session?

Please contact me if you need further information or if you have any questions.

With sportive regards also from Tomasz Bernat- IBU
Augusto
